This month's topic:

ZEN AND THE ART OF SYNCING

Easy ways to synchronize and share your files and data between your
Mac and iOS devices
to be presented by **Roger Owens**

If what is here matches perfectly with what is over there, you likely have a case of what you might call divine symmetry. In the universe of Macs, iPhones and iPads, syncing and sharing have never been easier. At our August meeting, Roger will show exactly how to synchronize your data and files among your Apple devices, and how to share files with others or with yourself. On the agenda are how to sync Apple apps, including Mail, Calendar, Safari bookmarks and history, your iBooks library, Pages, iMovie, Preview, and more; how to sync third-party apps such as Dropbox, Google Drive, Skype, your Kindle library, Pocket, and many others; and how sharing is accomplished in many apps, including third-party apps. Essentially, everything but the kitchen sink. Along the way, we will also have a look at cloud computing, the Apple way. When faced with a choice of whether to sync or swim, we recommend syncing. Please Join us. Even if you are new to all this, we promise you will quickly learn to love that syncing feeling.

Also,

BACK TO MAC BASICS

In this segment, we focus on more fundamental skills, to make life a little easier for those who are trying to learn how to use their Macs. This month:

EMAIL WYSIWYG (What You Send Is What They Get)
to be presented by **Rob Ellis**

Sending an email, only to have something go wrong in the process, can open a combination of riddles. Why does the email look different to the recipient? Why is the font not the font you chose? Why are parts missing? Why was the email never even delivered? On Tuesday, Rob will explain the causes of these riddles and how to solve them, along with many tips to help ensure that your sent emails will arrive, and will look to others as you intended.
