

Our next meeting is:

**March 5th, 2019 — Tuesday**  
*at Creative Source (location details below)*

**6:30 PM — Socializing, news and announcements**  
**7:00 PM — Presentations begin**

**Plus a fun DOOR PRIZE! (The raffle is for all attending, and the winner could be you.)**

This month's topic:

## **APPLE GOODIES AND GIZMOS**

A well-rounded assortment of four common items now available as uncommonly-great technology to be presented by **Tom Davis, Al Risaliti, and Annette Davis**

The devices we will be featuring at Tuesday's meeting have something in common. Besides their business ends typically being circular, all have existed in various forms for a very long time, but now are available as digital wonders which are either sold as Apple devices, or can be used with Apple devices. Our roundup will comprise two iPhone how-tos, one set of new Apple Watch features, and one cool gadget for Mac. Tom will provide tips on how to use the various controls of the iPhone's built-in camera. And utilizing that same lens for a different purpose, Tom will show how to use the iPhone as a digital magnifying glass. Al will demo some of the latest features of the Apple Watch, such as several new watch faces, and will explain how it can help with driving directions, how the watch knows if you fall and how it can help you get help, how to make use of the heart rate monitor, and, amazingly, how to take your own electrocardiogram and send it to your doctor. Annette will show where to buy a digital microscope, what is in the box, how to assemble and set up the microscope, and will demonstrate a variety of things you can see with it, how to use its accompanying app, and how you can use it to take photos and videos. March is traditionally the month for four-leaf clovers, and fittingly, our March meeting will include four segments likely to leave you feeling lucky, and luckier still if you win the door prize.

A watch, a camera, a magnifying glass, and a microscope are extraordinary tools, all the more extraordinary (and powerful) if they are digital, and even more extraordinary (and compact) if two of them are built into your phone. Please join us on Tuesday to see how they work, and please feel free to bring a friend. See you there!
