This month's topic:

HOW TO FREE UP SPACE ON YOUR MAC, IPHONE, OR IPAD

Easy techniques and apps to reclaim storage capacity on your Apple devices
to be presented by **Rob Ellis**

Many of us, when purchasing a new Mac or iOS device, ogle its glorious amounts of storage space, delighted in the illusion that we will never run out of room, only to discover later that we were quite mistaken. On Tuesday, Rob will show built-in capabilities for evaluating and reclaiming disk space, as well as apps that make the process faster, easier and much simpler by scanning disks, displaying clearly which files and folders are consuming the most space, finding and comparing duplicate files, and allowing you to easily delete any superfluous, space-hogging culprits. Please join us at our September meeting, where your personal space will be respected, and you just might leave with more of it.

Also,

BACK TO BASICS

In this segment, we focus on more fundamental skills, to make life a little easier for those who are trying to learn how to use their Macs and iOS devices. This month:

NEW TIPS FOR TAKING GREAT PHOTOS AND VIDEOS WITH YOUR iPHONE

to be presented by **Al Risaliti**

In March, Tom Davis showed how to use the various controls of the iPhone's built-in camera. On Tuesday, Al will provide some great follow-up tips from a photography point of view, such as taking control of your focus and exposure instead of the the phone automatically setting them, a better way to hold and steady the phone, time lapse tricks, changing your display setting to be more courteous in a crowd, and the best uses of 'burst' mode.

Millionaires, believing they will never run out of money, occasionally find themselves as relative paupers, with very few funds remaining. So it is with file space, but that problem has far simpler solutions. Please join us on Tuesday, via ordinary vehicle or limousine, to learn how to increase your wealth of storage space. And please feel free to bring a friend. See you there!
